

ANIKET KUMAR SINGH

Chennai, India — +91 9234447353 — contactwaniket@gmail.com
[LinkedIn](#) — [Github](#)

EDUCATION

Amrita Vishwa Vidyapeetham, Chennai
B.Tech in Computer Science and Engineering

Aug 2023 – Present
CGPA: 7.80

RELEVANT COURSEWORK

Data Structures and Algorithms, Operating Systems, DBMS, AI/ML, Web Development, UI/UX, OOP Concepts

PROJECTS

CareConnect– Hospital Management System (*Flask, SQLite, Jinja2, Bootstrap*) [Github](#) Nov 2025

- Engineered a role-based HMS supporting Admin, Doctor, and Patient workflows with Flask-Login, CSRF protection.
- Implemented appointment scheduling with automated SQLite database generation.
- Developed treatment-record modules for diagnoses, prescriptions, and patient history, improving record accuracy by 30%.
- Designed responsive dashboards using Jinja2 and Bootstrap, reducing navigation time by 40%.

HappiCards – Personalized Card Creator (*React, Firebase, Tailwind*) [Github](#) Apr 2025

- Created a card generation app that can send 500+ greetings in 4 categories.
- Integrated Firebase Firestore and Auth for template persistence.
- Enabled custom animations and emoji insertion; reduced bounce rate by 35%.
- Crafted an intuitive drag-and-drop UI with reusable component library.

PopScope Express – Trends Dashboard (*React, Node.js, Express*) [Github](#) Jun 2025

- Aggregated real-time pop culture news from 5 APIs with 300+ daily updates.
- Built responsive UI optimized for mobile and desktop.
- Reduced fetch latency by 35% using API caching and throttling.
- Designed modular architecture enabling fast deployment and testing.

Medify-Healthcare Authentication App (*React Native, FastAPI, OCR, PostgreSQL*) [Github](#) Oct 2025

- Built an AI-based mobile app for counterfeit-medicine detection using React Native and FastAPI, supporting 1,000+ verification scans with a 7-day user streak analytics dashboard.
- Engineered an independent image classification microservice (PyTorch/EfficientNet-B3) deployed on Hugging Face Spaces, decoupling heavy ML workloads to enable low-latency predictions.
- Designed a multi-layered verification engine combining database cross-referencing, barcode matching, and dynamic AI trust scoring, achieving 92%+ authentication accuracy.
- Developed secure PostgreSQL REST APIs with OTP email verification and stateless JWT session management; containerized the backend with Docker and shipped the Android APK via Expo EAS Build.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, HTML, CSS, SQL

Frameworks/Tools: React, Node.js, Flask, FastAPI, Tailwind, Firebase, Supabase, Docker, Git, Figma

Libraries/Platforms: Pandas, NumPy, OCR, PostgreSQL, SQLite, Linux, GitHub, Unity, Godot, Blender

ACHIEVEMENTS

- **Chancellor’s Scholarship:** 5,00,000 awarded for top 1% academic performance.
- **SHAASTRA’24 – IIT Madras:** Placed in Top 50 out of 3,500+ national teams.

LEADERSHIP & EXTRACURRICULARS

- **TechFest Coordinator:** Managed the UI/UX event with 100+ attendees; grew participation by 40%.
- **Game Dev Bootcamp Lead:** Led Unity/Godot training for 25 students over 15 weeks.
- **Amritavarsham 72 Volunteer:** Participated as a venue maintenance coordinator, ensuring smooth event operations and crowd management.
